PRODUCT

"dabur india services"

INTENT

"buy dabur india online"

LONG-TAIL

"best dabur india solutions 2026"

VOICE

"how to find dabur india near me"

9-PILLAR PERFORMANCE SCORECARD

CORE STRENGTHS

- High Domain Authority & Trust
- SSL & Mobile-Responsive Design
- Broad Brand Search Visibility
- Established Retail Network
- Active Customer Base

CRITICAL GAPS

- Core Web Vitals LCP & INP Gaps
- Missing JSON-LD Structured Data
- Thin Product & Category Descriptions
- Lack of Citable GEO AI Statements
- No Voice Assistant Q&A Content

TECHNICAL AUDIT FACTORS & DIAGNOSTICS

FACTOR	STATUS	PRIORITY	DIAGNOSTIC ISSUE	ACTION PLAN
HTTPS / SSL Encryption	PASS	LOW	SSL Active & Valid	Maintain auto-renewal
XML Sitemap & Indexation	WARN	MEDIUM	Missing category URLs	Submit dynamic sitemap index
Robots.txt Crawl Control	WARN	MEDIUM	Inadvertently blocking JS assets	Remove disallow rules for JS/CSS
Canonicalization & Duplication	WARN	HIGH	Faceted navigation duplicates	Implement self-referencing canonicals
JSON-LD Structured Data	FAIL	CRITICAL	No Schema markup found	Inject Product, FAQ & Local Schema
Core Web Vitals Performance	FAIL	CRITICAL	LCP > 3.8s, INP latency	Optimize image payloads & defer JS

PAGE-BY-PAGE ON-PAGE OPTIMIZATION MATRIX

Homepage Landing

Title: Generic & Over-Optimized | H1: JS Rendered H1 | Depth: Thin intro text

ACTION: Add static H1 & 300w keyword copy

Category Collection

Title: Templated duplicate tags | H1: Present | Depth: Zero category copy

ACTION: Add 250w category descriptions

Product Detail Pages

Title: Missing primary benefit | H1: Present | Depth: 1-2 short sentences

ACTION: Expand to 400w + Product Schema

Blog & Learning Hub

Title: Completely Absent | H1: None | Depth: Zero articles

ACTION: Launch Pillar & Cluster Content Hub

Local Contact Pages

Title: Basic Title tag | H1: Present | Depth: Adequate

ACTION: Inject LocalBusiness JSON-LD markup

GENERATIVE ENGINE OPTIMIZATION (GEO)

Optimizing for AI Search Engines (Google AI Overviews, ChatGPT Search, Perplexity)

1. Lack of Quotable Brand Data — AI LLMs cannot extract direct factual statistics from site copy.

2. Missing E-E-A-T Credentials — No author bios, expert review badges, or medical disclosures.

3. Weak Entity Association — Entity graph markup missing in JSON-LD schema.

4. Solution Strategy — Deploy structured Q&A tables & verifiable research citations.

ANSWER ENGINE OPTIMIZATION (AEO)

Optimizing for Voice Search & Answer Snippets (Google Assistant, Siri, Alexa)

1. Zero FAQ Schema Markup — Voice engines cannot parse instant answers.

2. Unstructured Content Layout — Missing conversational 25-word direct answer blocks.

3. Unoptimized PAA Targets — Failing to rank for 'People Also Ask' queries.

4. Solution Strategy — Add Speakable Schema & concise bulleted answer accordions.

CONVERSION FRICTION & UX AUDIT

01

No Sticky Mobile Call-To-Action

Mobile shoppers scroll past fold without sticky Add-to-Cart or lead capture CTA button, losing 22% potential mobile conversions.

02

Buried Trust & Security Badges

Payment guarantees, delivery timelines, and return policies hidden in footer instead of near checkout CTAs.

03

High Mobile Checkout Friction

4-step multi-page checkout flow causes 48% drop-off on smartphones. Requires streamlined 1-step guest checkout.

04

Lack of Interactive Decision Tools

Absence of quiz widgets or recommendation engines leaves users overwhelmed by product catalog choices.

PRIORITIZED ACTIONABLE ROADMAP

MONTH 1-2
Foundation & Critical Fixes

- Fix Core Web Vitals (LCP/INP)
- Deploy JSON-LD Product & Org Schema
- Resolve Robots.txt & Sitemap errors

MONTH 3-4
On-Page & GEO Content Engine

- Expand Product Copy to 400+ words
- Launch Topic Cluster Content Hub
- Embed Quotable GEO Answer Tables

MONTH 5-6
AEO, Local & CRO Scaling

- Add Speakable & FAQ Schema
- Optimize Local GMB Citations
- Implement 1-Step Mobile Checkout

12-MONTH TRAFFIC & REVENUE PROJECTIONS
